## PROFESSIONAL SUMMARY

Backend Engineer with **4 years** of experience designing and owning high-traffic, distributed systems at scale using **Java, Spring Boot, Kafka, and Apigee (GCP)**. Deep expertise in **payment systems** (Stripe, gift card orchestration, PCI-compliant workflows), **event-driven microservices**, and **API gateway management** for large-scale consumer platforms serving millions of subscribers. Proven track record of **technical design ownership**, incident response, and cross-team delivery. Recognized with **CIO Award** and **3x Spot Awards** for driving critical system reliability and complex API integrations on AWS and GCP.

## EXPERIENCE

### DISH Network (Echostar)

*Backend Developer*

Aug 2022 – Present

*Bengaluru, Karnataka, India*

- **Java & Spring Boot:** Architected production-grade **Java 11/17** microservices using **Spring Boot, Spring MVC, Spring Security**, and **Hibernate** – serving millions of subscribers across DISH and Sling TV platforms with **99.9%+ uptime SLA**.
- **Payment Systems:** Owned end-to-end backend for **Stripe credit card integration** and **gift card payment orchestration**, processing **10M+ transactions/month**; designed **PCI-compliant** tokenized workflows, webhook event handling, and fraud-prevention validation layers.
- **Event-Driven Architecture – Kafka:** Designed **Kafka-based async pipelines** for real-time data streaming and vendor communication across microservices, reducing inter-service latency by **40%** and improving fault tolerance via dead-letter queue strategies.
- **Cloud – GCP & AWS:** Deployed and operated microservices on **GCP** (Cloud Run, Apigee X, Pub/Sub) and **AWS** (EC2, S3, SQS, Lambda); containerized workloads with **Docker** and **Kubernetes**, enabling auto-scaling under peak load.
- **Database & Caching:** Designed relational schemas on **PostgreSQL** and **MySQL**; implemented **Redis** caching reducing DB load by **35%**; optimized slow queries cutting p99 latency from **800ms to under 120ms**.
- **Mentorship & Code Quality:** Mentored junior engineers through design and code reviews; enforced **85%+ test coverage** (JUnit 5, Mockito); integrated **SonarQube** and **Snyk** in **Jenkins / GitHub Actions** CI/CD pipelines for zero-downtime deployments.

## PROJECTS

### Gift Card Services | *Java, Spring Boot, Kafka, Apigee, AWS/GCP, REST APIs*

- Designed and built backend microservices for **vendor integration and payment orchestration** supporting gift card redemption flows across Dish and Sling platforms.
- Implemented **Kafka-based asynchronous workflows** to handle vendor communication and event processing, ensuring reliable message delivery and decoupled service architecture.
- Designed API contracts, payload transformation layers, and validation pipelines for seamless third-party vendor integration via **Apigee** gateway.

### Credit Card Payment Services – Stripe Integration | *Java, Spring Boot, Stripe API, Kafka, AWS/GCP, Apigee*

- Developed backend services integrating **Stripe payment gateway** with Dish/Sling platforms, handling tokenized card processing, payment authorization, and **webhook-based event handling**.
- Designed **PCI-compliant payment workflows** with secure API validation, request signing, and real-time monitoring to ensure zero payment data exposure.

### Netflix Account Integration – DISH Hopper | *Java, Spring Boot, Apigee, REST APIs*

- Built backend services enabling **Netflix account linking and subscription activation** on Dish devices; enforced header/payload security policies via Apigee to prevent injection and tampering.

### AI Receipt Manager & Financial Advisor | *Google Agent AI, Google Wallet API, Multimodal AI*

- **Finalist out of 9,100 teams** – Google Agent AI Hackathon. Built an AI-powered multimodal receipt manager with real-time expense tracking and personalized savings recommendations via Google Wallet API.

## TECHNICAL SKILLS

**Languages:** Java (11/17), C++, JavaScript, SQL

**Backend Frameworks:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Node.js

**System Design:** Microservices, REST APIs, Event-Driven Architecture, Circuit Breaker, CQRS, CAP Theorem

**Messaging & Streaming:** Apache Kafka, Google Cloud Pub/Sub, AWS SQS

**Cloud & DevOps:** GCP (Cloud Run, Apigee X), AWS (EC2, S3, SQS), Docker, Kubernetes, Jenkins, GitHub Actions

**Databases:** PostgreSQL, MySQL

**Quality & Tools:** JUnit 5, Mockito, SonarQube, Snyk, Postman, Maven, Gradle, Git, JIRA

## EDUCATION

**Amity University, Jaipur**

*Bachelor of Technology – Computer Science & Engineering | GPA: 8.35/10*

2018 – 2022
